

SQL Reporting for CompliantPro - September 13 & 14, 2011

This two-day course is offered in our **Lexington, MA** office. In this course you will learn how to use the database tables/views to build SQL queries that are not available from the user interface. Course requirements **and** attendee requirement per customer are as follows: someone with Database and SQL knowledge and a CompliantPro Product Champion to ensure the right data is captured in a query. Previous Administrative product training and the release of one CompliantPro module is a must.

- Enabling External Reporting Fields
- Basic Review of Terms and Definitions
- Best Practices for Naming Reporting Keys
- Analysis of Business Needs
- Extraction of CompliantPro Data from Views and Tables
- Key Joins of Tables/Views
- Extraction of SQL Query to Excel (Or Any Reporting Tool)
